ROSECEA & PIGMENTATION TREATMENT

Limelight IPL treatment works by using an intense pulse light to heat the targeted tissue, Whether that is pigmentation or damaged veins in the top layers of the skin. IPL effectively reduces discolouration, promoting a more even skin tone and treating specific skin conditions such as pigmentation, age spots, rosacea and broken capillaries without abrading the skins surface.

A patch test is required for this service 24-48 hours before treatment.

MORPHEUS 8

Morpheus8 at KX Spa is a cutting-edge, minimally invasive skin rejuvenation treatment that combines microneedling with radiofrequency (RF) energy to remodel and tighten the skin at a deep cellular level. Using ultra-fine needles, RF energy is delivered beneath the skin's surface, creating micro-lesions that activate the body's natural healing response and stimulate the production of new collagen and elastin.

Ideal for treating fine lines, skin laxity, scarring, and stretch marks, Morpheus8 is suitable for both the face and body, especially effective for improving the appearance of loose or sagging skin.
